

Postcards from Our Partners

Community Conservation Partnerships

NPS Photo: Paul Carson, Sup. of the Overmountain Victory NHT and Karen Compton, Acting Grandfather District Ranger, USFS.

The NPS Rivers, Trails, and Conservation Assistance Program has been vital in helping us develop partnerships along the route of the Overmountain Victory National Historic Trail.

The networking that results from NPS community-based facilitation has been invaluable in opening doors and ensuring our continued progress.

community conservation
in the
National Park Service*

Lake James Trail Project , Burke County, NC -
Development of 25 new miles of trail around Lake James that will help connect these trails to the Overmountain Victory National Historic Trail.

We want to hear from you.

*The
National Park Service*

The Rivers, Trails, and Conservation Assistance program is a community conservation resource of the National Park Service. We collaborate with partners and National Park areas in communities across America.

Each year, our staff help 300 communities:

- Create over 1,200 miles of new hiking, walking, and biking trails,
- Protect nearly 300 miles of rivers and watersheds, and
- Preserve over 61,000 acres of new natural areas.

We help our partners:

create local, regional, and state networks of rivers, trails, parks greenways, and natural areas.

Drop us a line.

The Rivers, Trails and Conservation Assistance Program implements the natural resource conservation and outdoor recreation mission of the National Park Service in communities across America.
